# Create a duplicate button

Summary	
Module	Function Buttons + Universal functions
Level	Medium
Requirements	B1UP 4.1.0.0 or higher

#### **Scenario**

In this sample we wish to create a duplicate button if a sales Quotation to the same customer (SAP's default duplicate does not include the BP... only the lines).

## **Needed Configuration**

We will need 1 universal functions and a function button configuration in order to do this.

#### **Universal Functions**

First we need to create the Universal function macro that should do the task:

Universal Funct	ion Configuration		
Code	UF-268	Remarks	
Name	Duplicate	2	
Туре	Macro		
	Transfer(\$[\$4.0.0] STORE1); / Activate(1287); //Data > Duplic Transfer(STORE1 \$[\$4.0.0]); /	/Store the BP code cate /Set the BP code on the new entry	A @
	Command Activate();	▼  <u>W</u>	izard Quick insert
Update	Cancel	Im	Export Export

### **Function Button**

Now that we have the functionality we will a function button but right-clicking the Sale Quotation window and choose Add function Buttons to this window

We set the caption to Duplicate and uncheck the Find and Add checkboxes (as we should only be able to press this button in OK mode)

We then choose our Universal Function and press add.

# Use of functionality

You should now be able to navigate to an existing sales quotation press our button and have a duplicate.
